

Brand: Ranger

Model: RML-750HD

Description: Motorcycle Lift Platform with Front Wheel Vise

The Beast of Motorcycle Lifts

Nowhere will you find a more equipped Motorcycle / ATV lift that can handle all your service and hobby needs. In addition to its outstanding 1,500 lb. lifting capacity, the RML-750HD employs a dual functioning pump. That's right, you can pump that precious machinery with either your foot or an air compressor, the choice is yours. But there's much more to the story than that. The RML-750HD features 12-gauge steel construction, built-in retractable swivel casters, reversible bolt-on side extensions, the approach ramp extension, automatic safety locks, the single hydraulic lifting cylinder and the retracting rear wheel deck. Without a doubt, the RML-750HD is loaded with Ranger's finest materials and most convenient innovations.

But don't forget, this beast isn't too hard on the eyes either. The red powder-coat finish brings a combination of style and protective durability to this already impressive piece of equipment. The RML-750HD raises a full 36" from its lowered height, but if for any reason you want to work on that bike or ATV at an even higher altitude, just combine this lift with the RML-800 jack accessory.

Features

- Built-in retractable swivel casters—can be moved when loaded
- Full travel automatic safety locks
- Heavy 12-gauge steel construction
- Single hydraulic lifting cylinder
- Dual function power unit: air or hydraulic pump operation
- Approach ramp extension for loading low clearance bikes
- Durable powder coat finish
- Reversible bolt-on side extensions can be also used as parts trays
- Retracting rear wheel deck
- Multiple locking positions allows for various working heights
- Includes rear support poles. Use the support poles in conjunction with straps to suspend rear of bike for free wheel work
